About the conference

“New Challenges and Innovations in Molecular Medicine” is the theme of the present international conference. The conference will highlight cutting-edge advances in the convergence of chemical sciences with molecular biology, medicine, nanotechnology, and medicine. The objective of this conference is to bring together some of the highly reputed experts on a common and vibrant techno-friendly platform and provide a podium for exchanges of scientific ideas and expertise among them. The event will bring together scientists, researchers, clinicians, and industry leaders from around the world to share ground-breaking discoveries and discuss cutting-edge innovations that are shaping the future of healthcare. With the evolving landscape that includes the threat of emerging infectious diseases, cancer biology complexities, neurodegenerative diseases, and antibiotic resistance the pressure for new ideas is at its peak. The purpose of this conference is to provide an opportunity for the delegates to present the most recent advances, technological innovations, and treatment modalities in place in the field of molecular medicine that include the most radical changes made. Drug discovery is one of the most complicated tasks for researchers in universities, research institutes and pharmaceutical companies. Success in drug discovery programs cannot be achieved without the collaborative participation of academia, research, pharmaceutical, and government. With an exciting line-up of keynote speakers, interactive session, and engaging panel discussions, attendees will have the opportunity to deepen their knowledge, network with peers, and collaborate on novel approaches to molecular research and medicine. Topics will cover the emerging areas in **Molecular Biology, Biochemistry, Chemical Biology, Organic/Bio-organic/Bio-inorganic chemistry/New materials and Drug Discovery**. The conference will be suitable for researchers, faculty members, post-docs, doctoral students and post-graduate of science discipline. The scientific event will comprise keynote talks, plenary presentations, and poster sessions.
